Corrections for
*Murach’s ADO.NET 4 Database Programming with VB 2010*

These are the corrections for the significant errors in each printing of this book. In addition to the corrections listed here, you may find some trivial typos and formatting errors. All types of corrections will be made in the next printing of the book.

**How to tell which printing your book is in**

Below the copyright notation on the back of the title page (page iv), you’ll find a series of numbers like this:

10 9 8 7 6 5 4 3 2 1

The number on the right of this sequence tells which printing your book is. In this example, it’s the first printing, which is currently the only printing for this book (February 2011).
Corrections to the first printing

Chapter 4, page 122
The next to last sentence of the last paragraph should indicate that currency formatting was applied to the InvoiceDate, DueDate, and PaymentDate columns, not numeric formatting.

Chapter 12, page 421
In the code example, the Description column of the GridView control is displayed using a template field. It should be displayed using a bound field instead, since template fields aren’t covered until later in the book.

Chapter 14, page 517
The introductory paragraph for exercise 14-1 should refer to figure 14-4, not figure 14-20.

Chapter 14, page 518
The introductory paragraph for exercise 14-2 should refer to figure 14-20, not figure 14-12.

Chapter 16, page 580
The next to last paragraph on this page indicates that the average invoice value is calculated for each vendor listed on the Vendor Invoices report shown on page 581 as well as for the entire report. That is incorrect. The report only shows the average invoice values for the vendors.

Chapter 16, page 596
The second sentence of the last paragraph under the “How to create a chart report” heading should say that to add a title to a chart, you can edit the default text in the Chart Title text box. You can’t add a title by typing it into the chart area.

Chapter 17, page 630
The next to last sentence in the second paragraph under the “How to create an object data source from an entity class” heading should refer to figure 17-12, not figure 17-11.

Chapter 17, page 639
Step 3 of exercise 17-1 should refer to figure 17-14, not figure 17-15.
