Corrections for
Murach’s Java Programming

These are the corrections for the significant errors in each printing of this book. In addition to the corrections listed here, you may find some trivial typos and formatting errors. All types of corrections will be made in the next printing of the book.

**How to tell which printing your book is in**

Below the copyright notation on the back of the title page, you’ll find a series of numbers like this:

```
    10 9 8 7 6 5 4 3
```

The number on the right of this sequence tells which printing your book is. In this example, it’s the third printing (June 2013).
**Corrections to the second printing**

**Chapter 20, page 661**

The second heading should say “Four important J A R files” (not “Three important J A R files”).
Corrections to the third printing

Chapter 1, page 33
In step 5, the project should be ch01_ex1_TestScore (not ch01_ex2_TestScore).

Chapter 2, page 45
Under the “Statements that mix int and double variables” heading, the first line should be:
```java
int result9 = (int) invoiceTotal / invoiceCount // result9 = 125
```
Not:
```java
int result9 = invoiceTotal / invoiceCount       // result9 = 125
```

Chapter 16, page 508
In the second paragraph, it should say “four items” (not “three items”).
Corrections to the fourth printing

Chapter 9, page 277
The second bullet should say, “A class that implements an interface must provide an implementation for each method defined by the interface, or the class must be declared as abstract.”
