<tr>
<td>B</td>
<td>A summary of the applications in this book</td>
<td>551</td>
</tr>
<tr>
<td>C</td>
<td>How to resolve $ conflicts</td>
<td>555</td>
</tr>
</tbody>
</table>
Expanded contents

Section 1  JavaScript essentials for jQuery users

Chapter 1  Introduction to web development

How a web application works ............................................................4
The components of a web application ..............................................4
How static web pages are processed ..............................................6
How dynamic web pages are processed ........................................8
How JavaScript and jQuery are used for client-side processing ........................................8

The components of a JavaScript application ................................12
The HTML .....................................................................................12
The CSS ......................................................................................14
The JavaScript .............................................................................16

The HTML skills that you need for this book ...............................18
How to use the HTML5 semantic elements ...............................18
How to use the div and span elements ...........................................20
How to use the basic HTML attributes ........................................22

The CSS skills that you need for this book .................................24
How to provide the CSS styles for an HTML page .......................24
How to code the basic CSS selectors ..........................................26
How to code CSS rule sets .........................................................28

How to test a JavaScript application ...........................................30
How to run a JavaScript application .............................................30
How to find errors in your code ..................................................32
How to provide cross-browser compatibility ...............................34

How to use Aptana to develop JavaScript applications ............36
How to create or import a project .................................................36
How to work with files ...............................................................38
How to edit a file ........................................................................40
How to run a JavaScript application ...........................................42

Chapter 2  A JavaScript subset for jQuery users

The basics of JavaScript .................................................................50
How to include JavaScript in an HTML document ......................50
How to code JavaScript statements .............................................52
How to create identifiers ..............................................................54

How to use primitive data types to work with data ..................56
The primitive data types .............................................................56
How to code numeric expressions ..............................................58
How to work with numeric variables ........................................60
How to work with string and Boolean variables .......................62

How to use objects to work with data ......................................64
How to use objects, methods, and properties ..............................64
How to use the window and document objects .........................66
How to use Textbox and Number objects ...................................68
How to use Date and String objects ...........................................70
Section 2 jQuery essentials

Chapter 5 Get off to a fast start with jQuery

Introduction to jQuery .............................................. 158
What jQuery is ................................................................. 158
How jQuery can simplify JavaScript development .............. 160
How jQuery UI and plugins can simplify JavaScript development 162

The basics of jQuery programming .............................. 164
How to include jQuery in your web pages ......................... 164
How to code jQuery selectors .......................................... 166
How to call jQuery methods ............................................ 168
How to use jQuery event methods .................................... 170

The Email List application in jQuery .......................... 172
The user interface and HTML ........................................... 172
The jQuery ........................................................................ 174

A working subset of selectors, methods, and event methods ........................................... 176
The most useful selectors .................................................. 176
The most useful methods ................................................... 178
The most useful event methods ......................................... 180
Other event methods that you should be aware of .............. 182

Three illustrative applications ....................................... 184
The FAQs application in jQuery ..................................... 184
The Image Swap application in jQuery ............................ 186
The Image Rollover application in jQuery ......................... 190

Chapter 6 How to use effects and animations

How to use effects ....................................................... 196
The jQuery methods for effects ........................................ 196
The FAQs application with jQuery effects ........................ 198

A Slide Show application with effects .......................... 200
The user interface, HTML, and CSS ................................. 200
Two ways to code the jQuery ............................................ 202
How to stop and start a slide show ................................... 204

How to use animation .................................................. 206
How to use the basic syntax of the animate method .......... 206
How to chain animate methods ........................................ 208
How to use the delay, stop, and finish methods ................... 210
How to use easings with effects and animations ................. 212
How to use the advanced animate syntax
and the methods for working with queues ......................... 214

A Carousel application with animation ....................... 216
The user interface, HTML, and CSS ................................. 216
The jQuery ........................................................................ 218

</table>
Section 4  Ajax, JSON, and APIs

Chapter 12  How to use Ajax, JSON, and Flickr

Introduction to Ajax .................................................................376
How Ajax works ........................................................................376
Common data formats for Ajax ................................................378
The members of the XMLHttpRequest object ............................380
How to use the XMLHttpRequest object .................................382

How to use the jQuery shorthand methods for Ajax ..................384
The jQuery shorthand methods for working with Ajax ...............384
How to use the load method to load HTML data .......................386
How to use the $.get or $.post method to load XML data ..........388
How to use the $.getJSON method to load JSON data ...............390
How to send data with an Ajax request ....................................392

How to use the $.ajax method for working with Ajax ...............394
The syntax of the $.ajax method .............................................394
How to use the $.ajax method to load data .............................396

How to use Ajax with Flickr ..................................................398
How to use the feed API for Flickr .........................................398
How to display Flickr data on a page .......................................400
How to review the feed from a website ....................................402
How to display descriptions for a Flickr photo feed ................404
How to search for photos by tags ............................................406

Chapter 13  How to use the API for Google Maps

Introduction to Google Maps ..................................................412
Introduction to the Google Maps API .......................................412
The classes for adding a Google map to a web page ..................414
The script element for the Google Maps API .............................416
How to add a Google map to a web page .................................416

How to display markers on a map ..........................................418
The classes and methods for geocoding and markers ...............418
How to create an address list that displays markers .................420

How to display messages on a map ........................................422
The classes and methods for messages and markers ................422
How to add messages to markers ...........................................424
How to add custom messages to markers ...............................426
How to add Flickr images to messages .....................................428

How to display driving directions on a web page ....................430
The classes and methods for directions and listeners ...............430
How to display driving directions with a map ..........................432

Chapter 14  How to use the HTML5 APIs

An introduction to the HTML5 APIs .......................................438
Common HTML5 APIs .........................................................438
How to get information about an HTML5 API ..........................440

How to use the Geolocation API ............................................442
How Geolocation works .......................................................442
How to show a user’s position on a Google map ......................444
How to handle Geolocation errors ........................................446
How to use the Web Storage API ..................................................448
How to use local storage ..................................................................448
How to use session storage ..............................................................448

How to use the Web Workers API ..............................................450
How the Web Workers API works ..................................................450
How to use a web worker to retrieve data using Ajax .......................452

An application that uses a web worker and web storage ...............454
The user interface .........................................................................454
The HTML ....................................................................................456
The JSON data .............................................................................458
The jQuery code ...........................................................................460

Section 5 jQuery Mobile

Chapter 15 Get off to a fast start with jQuery Mobile

How to work with mobile devices ............................................470
How to provide pages for mobile devices ...................................470
How to use a JavaScript plugin to redirect mobile browsers to a mobile website ...472
How to set the viewport properties ............................................474
Guidelines for designing mobile web pages .................................476
Guidelines for testing mobile web pages .....................................476

How to get started with jQuery Mobile ......................................478
What jQuery Mobile is and where to get it .................................478
How to include jQuery Mobile in your web pages ......................480
How to create one web page with jQuery Mobile .......................482
How to code multiple pages in a single HTML file ...................484
How to use dialogs and transitions ............................................486
How to create buttons ..................................................................488
How to create a navigation bar ..................................................490

How to format content with jQuery Mobile .................................492
How to work with the default styles ............................................492
How to apply themes to HTML elements ....................................494
How to use ThemeRoller to roll your own theme .........................496

A mobile website for Vecta Corp .................................................498
The layout of the website .............................................................498
The HTML for the mobile website .................................................500
The style sheet for the mobile website .......................................500

Chapter 16 How to enhance a jQuery Mobile website

How to use the jQuery Mobile documentation .............................508
The demos for jQuery Mobile ....................................................508
The data attributes of jQuery Mobile ..........................................508
The events, methods, and properties of jQuery Mobile ..................508

How to use jQuery Mobile to format content ...............................510
How to lay out content in grids ..................................................510
How to use collapsible content blocks ......................................512
How to use collapsible sets .......................................................514

How to use jQuery Mobile for list views ......................................516
How to use basic lists ...............................................................516
How to use split button lists and inset lists .................................518
How to use list dividers and count bubbles .................................520
Expanded contents

How to use jQuery Mobile for forms .............................................522
How to use text fields and text areas ..............................................522
How to use sliders and switches .....................................................524
How to use radio buttons and check boxes ....................................526
How to use select menus ..............................................................528
How to submit a mobile form .......................................................530

An enhanced mobile website for Vecta Corp ...............................532
The layout of the website .............................................................532
The HTML ....................................................................................534
The style sheet .............................................................................534
